Executive Summary

Australia is on the frontline of climate change and its impacts.

We continue to swelter through record breaking heat, lengthening bushfire seasons, worsening coastal flooding and supercharged storms. Meanwhile, the national energy debate is reaching fever pitch, with renewable energy lambasted by our nation's political and industry leaders as unreliable and unaffordable, whilst "clean coal" technology and gas expansion is being promoted as Australia's future energy solution. As climate impacts worsen and government action stagnates, the window of opportunity to limit the warming of the planet is rapidly closing.

Throughout all of these challenges, local heroes have quietly been getting on with the job. Cities and towns across Australia are surging ahead with emissions reduction plans, switching to cleaner energy and building greener, efficient and more resilient communities. The Cities Power Partnership (CPP) will elevate and accelerate this action across the country. We know that transforming the way cities use and generate energy alone has the potential to deliver 70% of the total emissions reductions needed to stay on track for the 2 degrees limit set under the Paris Agreement.

The CPP will engage with towns and cities, via local councils, throughout Australia and incentivise councils to increase renewable energy and energy efficiency, improve transport and engage in advocacy. Members will also be given access to a national knowledge hub and a Power Analytics project assessment and tracking tool. They will be buddied with other cities to knowledge share, visited by domestic and international experts, connected with community energy groups and celebrated at events with other local leaders. We'll also showcase the incredible achievements of cities in national, local and social media to millions and share their successes with our community of over 200,000 members and supporters.

reports.

The Climate Council

The Climate Council is Australia's leading climate communications organisation. To date the Climate Council has produced 97 reports on climate impacts and solutions and was the number one organisation communicating on climate change nationally in 2016-7.

The Climate Council brings a unique set of skills that enable us to build and deliver the Cities Power Partnership program and ensure that it differs from existing programs for local councils. The Climate Council has significant media reach, generating nearly \$92 million worth of media, reaching a cumulative audience of 408 million. This media reach will be key as an incentive for cities to join the program as well as working to strengthen public support across the country for climate action at the local level.

In addition, the Climate Council hosts a wealth of leading experts in climate impacts and renewable energy solutions whose technical knowledge will be key to helping local councils to implement emissions reduction measures.

The Climate Council will also use its national status and the credibility of its Climate Councillors to connect councils across the country with community energy groups and local organisations who can help councils to implement energy efficiency and renewable energy measures quickly and effectively, as well as assist with accessing funding and incentives for councils to act.

The Challenge

Global heat records have been broken again, with 2016 declared the hottest for a third consecutive year. Australians continues to swelter through record breaking heat, lengthening bushfire seasons, worsening coastal flooding and supercharged storms.

The emission of greenhouse gases from the burning of fossil fuels like coal, oil and gas, are driving these dramatic changes of the climate system and need to be drastically reduced. However, the window of opportunity to limit the warming of the planet and its catastrophic impacts is rapidly closing and governments are struggling to meet this challenge at the pace required.

Local Champions

In the face of these challenges local champions have emerged.

Around the world and across Australia, towns and cities of all shapes and sizes are getting on with the job. They are surging ahead with emissions reduction plans, switching to cleaner energy and building greener, efficient and more resilient communities. From booming urban centres to small rural townships, local governments and groups of determined residents have been energy and climate trailblazers in many ways. Towns and cities can shape how land is used, investments are made and millions of dollars worth of renewable energy is rolled out. They can influence how new homes and businesses are built, determine the ways in which hundreds of thousands of residents will travel each day and band together to lobby for much needed state and federal policy change. Transforming the way cities use and generate energy alone has the potential to deliver 70% of the total emissions reductions needed to stay on track for the 2 degrees limit set under the Paris Agreement (IEA 2016).

"Local governments and groups of determined residents have been energy and climate trailblazers in many ways."

A Snapshot of the Cities Power Partnership

The Climate Council's Cities Power Partnership (CPP) seeks to celebrate and accelerate the emission reduction and clean energy successes of Australian towns and cities to date. We are calling on Mayors, Councilors and communities to take the next step towards a sustainable, non-polluting energy future by joining the CPP.

The CPP launched mid 2017, along with a Climate Council cities report authored by some of Australia's leading experts, a brand new CPP website and a media campaign featuring the 35 trailblazing councils who joined the partnership in round 1.

A round 2 launch in January 2018 saw us grow to 70 members, representing 8 million Australians and making us the largest climate action program for local government in the country. We now represent 250 towns and cities and rural shires across all Australian states and territories. See Appendix C for member list.

CPP launch breaks Climate Council media coverage records

The CPP media launch was held at the Mt Majura Solar Farm in the ACT and featured Climate Councilor Professor Tim Flannery, Climate Council CEO Amanda McKenzie, ACT Environment Minister Shane Rattenbury MLC and Lane Crockett, Head of Renewable Infrastructure, Impact Investment Group.

A record breaking coverage of 8 front pages, 250+ broadcast media items and 210+ print & online items. Each of the attending Mayors and Councilors and council communications teams received a comprehensive media kit including:

- Tailored media hits report,
- Certificate ceremony photos with Professor Tim Flannery,
- Mayoral test drive photos of the CPP branded Tesla electric cars,
- Individual interviews to camera explaining reasons for joining the Cities Power Partnership and what Council hopes to achieve,
- Drone footage of the Mt Majura solar farm tour,
- Parliament house media stop video footage

Participating councils who join the partnership will have 6 months to select 5 key actions from the partnership pledge ranging from renewable energy, efficiency, transport and advocacy (*see Appendix A for full pledge list and Appendix B for pledge examples*).

Future application rounds

We will open for a third round of intake from March 2018.

The Three Phases of the Cities Power Partnership

Become a Power Partner

Act:

Councils sign up to be a Power Partner.

Knowledge:

Partners get exclusive access to the extensive online knowledge hub, webinars and Power Analytics tool.

Connect:

Each Power Partner is buddied with two other local councils to knowledge share throughout the year.

Profile:

Power partners are profiled in national and local media, online and to our 200,000 members and supporters.

2

Power Up

Act:

Partners have 6 months to select 5 key actions from the partnership pledge ranging from renewable energy, efficiency, transport and advocacy. They must identify a point of contact within council who will liaise with the Climate Council and work to implement their actions. Pledges are submitted by each partner and profiled online.

Knowledge:

Partners will have ongoing access to the knowledge hub, Power Analytics reporting tool, webinars with domestic and international experts as well as communications and advocacy training where required.

Connect:

Power Partners will be buddied within & across state borders to deepen knowledge sharing across joint project areas of interest. Councils can also be connected with their local community energy group and relevant local organisations who can with help with implementation of emission reduction actions. Councils who are already leading will play an important knowledge sharing role with other partners.

Incentives:

Power Partners will be assisted with applications for project funding, third party grants and renewable energy incentives as they become available.

Profile:

Power partners and their local success stories will be profiled in the media by our dedicated CPP team Media Advisor working with Council communications teams. Climate Councillors will travel to a range of communities across Australia to engage in community events and talk to councils.

3

Power On

Act:

Partners report on progress against key actions in a 6 monthly survey, following the submission of their 5 pledge items.

Knowledge:

Partners access local and international knowledge and inspiration at the 2018 Power Partners Summit to be held October 18-19 in Kiama, NSW

Connect:

Partners will be brought together to celebrate the high achieving towns and cities at the Power Partners Summit October 18-19, 2018 in Kiama.

Profile:

Success stories will continually be celebrated in the media. The CPP annual awards, to be held at the annual Summit, will recognise & celebrate best practice project outcomes, collaborations and individual contributions. Climate Councillors will travel to a range of Australian communities, as more towns and cities become Power Partners and lead the switch to non-polluting energy across the country.

What Does Success Look Like?

Within 6 months of launching, the Cities Power Partnership has generated over 1000 media items and at 70 members and growing, is now the largest climate action program for local government in the country.

By mid 2018, up to 100 councils will pledge to become Power Partners.

The Power Partners will be supported to implement their pledge items through webinars with topic experts, access to shared project data via the knowledge hub and Power Analytics library and via networking with their peers through the CPP buddying program.

Achievements will be celebrated at the annual CPP Awards ceremony, to be held as part of the CPP Power Summit a 2 day conference to be held in October 2018.

Frequently Asked Questions

When is the Cities Power Partnership launching?

It launched in July 2017. The launch included the launch of the CPP website, the Local Government Action research report, a media and stakeholder launch which showcased the 35 towns and cities who have already pledged and a national media campaign.

A round 2 launch was held in January 2018 to welcome a further 35 councils to the partnership.

Can the broader community nominate their town or city to be part of the Cities Power Partnership?

Yes. Nominations can easily be made through the website at citiespowerpartnership.org.au/nominate/. Tell us why you think your Council or any other would be a good fit and if you have recommended points of contact within Councils, either staff or elected representatives, we're all ears.

How do community energy organisations get involved?

We are actively reaching out to community energy organisations across the country to get involved. The Cities Power Partnership wants to profile and connect community energy groups with councils involved in the partnership. There is an action pledge under "Work Together and Influence" for councils to strive to "support community energy groups with their community energy initiatives". This connection is vital to help councils achieve success as community energy groups and the community more broadly can provide on the ground support, including workshops and modelling, to help councils achieve their energy and sustainability commitments.

What if a town or city is already leading in renewable energy and sustainability, what does their city get out of joining the partnership ?

Cities leading the way play an essential role in the partnership. They will share their knowledge with other cities, their successes will be celebrated to an audience of millions to inspire others and they will have access to resources and incentives to help them to continue to lead.

Many trailblazing cities who are already leading will have some of their existing initiatives counted towards their power partnership pledge.

Appendix

Appendix A: The Partnership Action Pledge

Participating councils who join the partnership will have 6 months to select 5 key actions from the options below.

Renewable Energy

1. Use strategic and statutory planning processes to promote renewable energy – both at the residential, commercial and larger scale.

2. Provide council resources to educate and support the uptake of renewable energy, such as by hiring an internal renewable energy support officer or establishing an independent body (such as the Moreland and Yarra Energy Foundations).

3. Install renewable energy (solar PV and battery storage) on council buildings for example childcare facilities, libraries, street lighting, recreation centres, sporting grounds, and council offices.

4. Support community facilities accessing renewable energy through incentives, support or grants.

5. Power council operations by renewables, directly (with solar PV or wind), or by purchasing Greenpower (from electricity retailers). Set targets to increase the level of renewable power for council operations over time.

6. Encourage local businesses and residents to take up solar PV, battery storage and solar hot water heating. This can be done through providing incentives (such as solar bulk buy schemes or flexible payment options) or streamlining approval processes (such as removing planning and heritage barriers to solar PV).

-  **7.** Support community energy projects (with location and planning support) so that residents (such as renters) can band together and invest in community renewable energy projects.
-  **8.** Opening up unused council managed land for renewable energy, for example land fills, and road reserves.
-  **9.** Facilitate large energy users collectively tendering and purchasing renewable energy at a low cost.
-  **10.** Set minimum renewable energy benchmarks for new developments, for example Denman Prospect, ACT requires every new house to install a minimum solar PV system.
-  **11.** Electrify public transport systems (for example buses operated by council) and fleet vehicles and power these by 100% renewable energy.
-  **12.** Lobby electricity providers and state government to address barriers to renewable energy take up at the local level (whether these be planning, technical, economic or policy related).
-  **13.** Identify opportunities to turn waste to energy.
-  **14.** Implement landfill gas methane flaring or capture for electricity generation.
-  **15.** Create a revolving green energy fund to finance renewable energy projects and receive \$ savings.

Energy Efficiency

-  **1.** Set minimum energy efficiency benchmarks for all planning applications.
-  **2.** Adopt best practice energy efficiency measures across all council buildings, and support community facilities to adopt these measures.
-  **3.** Public lighting can use a large proportion of a city's energy budget - roll out energy efficient lighting (particularly street lighting) across the municipality.
-  **4.** Provide incentives (for example rate reductions) for best practice developments such as streamlined planning processes, and support for retrofitting energy efficiency measures for existing buildings.
-  **5.** Incentivise the deployment of energy efficient heating and cooling technologies.
-  **6.** Create a revolving green energy fund to finance energy efficiency projects and receive \$ savings.

Sustainable Transport

-  1. Ensure Council fleet purchases meet strict greenhouse gas emissions requirements and support the uptake of electric vehicles.
-  2. Provide fast-charging infrastructure throughout the city at key locations for electric vehicles.
-  3. Encourage sustainable transport use (public transport, walking and cycling) through Council transport planning and design. Substantial savings in transport energy use can be achieved by designing more compact cities with access to high quality public and active transport services and facilities.
-  4. Ensure that new developments are designed to maximize public and active transport use, and are designed to support electric vehicle uptake.
-  5. Providing for adequate cycle lanes (both space and connectivity) in road design and supporting cyclists through providing parking, and end-of-ride facilities (covered, secure bike storage, showers, bicycle maintenance and incentives).
-  6. Reduce or remove minimum car parking requirements for new housing and commercial developments where suitable public transport alternatives exist.
-  7. Lobby state and federal governments for improvements to planning legislation to promote sustainable transport options, and increased investment in and provision of public transport services.
-  8. Consider disincentives for driving high emitting vehicles such as congestion pricing, or a tiered payment system for residential car parking permits where high emitting vehicles pay more.
-  9. Waste collection fleet conversion to hydrogen fuelled or electric power.

Work Together and Influence

-  1. Set city-level renewable energy or emissions reduction targets and sustainable energy policies to provide a common goal and shared expectations for local residents and businesses.
-  2. Lobby state and federal government to address barriers to the take up of renewable energy, energy efficiency and/or sustainable transport, and to support increased ambition. For example working to lobby on the Smart Energy Communities policy.
-  3. Set up meetings and attend events, such as the Community Energy Congress or the Cities Power Partnership Summit, where like-minded cities can address common concerns and learn from others' experience.
-  4. Implement an education and behavior change program to influence the behavior of council officers, local residents and businesses within the municipality to drive the shift to renewable energy, energy efficiency and sustainable transport.
-  5. For communities reliant on a local coal industry, local government can support the transition away from fossil fuels, by lobbying for state and federal support for a just transition for workers, families and the community and encouraging local economic development and opportunities based on a low carbon economy.
-  6. Ensure that the practices of local government contractors and financing such as banking, insurance and super are aligned with council goals relating to renewable energy, energy efficiency and sustainable transport. Set appropriate criteria for council procurement.
-  7. Promote knowledge sharing and strengthen the local community's capacity and skills in renewable energy, energy efficiency and sustainable transport.
-  8. Support local community energy groups with their community energy initiatives.

Appendix C: List of Power Partners

First round of CPP Power Partners

1. Albury City Council (NSW)
2. Alice Springs Town Council (NT)
3. Bega Valley Shire (NSW)
4. Blacktown City Council (NSW)
5. Bundaberg Regional Council (QLD)
6. Byron Shire (NSW)
7. Canberra (ACT)
8. Canterbury Bankstown City Council (NSW)
9. Douglas Shire Council (QLD)
10. Eurobodalla Shire (NSW)
11. Glamorgan Spring Bay Council (Tas)
12. Hawkesbury City Council (NSW)
13. Huon Valley Council (Tas)
14. Kiama Municipal Council (NSW)
15. Ku-ring-gai Council (NSW)
16. Lane Cove Council (NSW)
17. Lismore City Council (NSW)
18. Moreland City Council (Vic)
19. Muswellbrook Shire Council (NSW)
20. North Sydney Council (NSW)
21. Noosa Council (QLD)
22. Parkes Shire Council (NSW)
23. Penrith City Council (NSW)
24. Shoalhaven City Council (NSW)
25. The City of Canning (QA)
26. The City of Darebin (Vic)
27. The City of Fremantle (WA)
28. The City of Newcastle (NSW)
29. The City of Kalgoorlie-Boulder (WA)
30. The City of Port Phillip (Vic)
31. The City of Swan (WA)
32. The Shire of Strathbogie (Vic)
33. Upper Hunter Shire Council (NSW)
34. Willoughby City Council (NSW)
35. Yass Valley Council (Vic)

Second round of CPP Power Partners

36. City of Armadale (WA)
37. Bathurst Regional Council (NSW)
38. Bayside City Council (NSW)
39. Bellingen Shire Council (NSW)
40. City of Boroondara (Vic)
41. Brighton Council (Tas)
42. Brisbane City Council (QLD)
43. Broken Hill City Council (NSW)
44. City of Bunbury (WA)
45. Cairns Regional Council (QLD)
46. Cumberland Council (NSW)
47. City of Darwin (NT)
48. City of Gosnells (WA)
49. City of Greater Dandenong (Vic)
50. Hornsby Shire Council (NSW)
51. Inner West Council (NSW)
52. City of Kwinana (WA)
53. Logan City Council (QLD)
54. City of Melville (WA)
55. Mornington Peninsula Shire (Vic)
56. Nambucca Shire (NSW)
57. Northern Beaches Council (NSW)
58. Northern Midlands Council (Tas)
59. City of Onkaparinga (SA)
60. Orange City Council (NSW)
61. City of Parramatta (NSW)
62. Randwick City Council (NSW)
63. City of Ryde (NSW)
64. Shire of Serpentine Jarrahdale (WA)
65. Sunshine Coast Council (QLD)
66. City of Sydney (NSW)
67. City of Wagga Wagga (NSW)
68. Waverley Council (NSW)
69. Wingecarribee Shire (NSW)
70. Woollahra Municipal Council (NSW)
