Question – Tim Wimborne

1. What effect will the changed water pricing system have on water consumption in
 - a) Braidwood
 - b) Bungendore
 - c) Captains Flat?

Response – Finance

Water users in the former Queanbeyan City Council area transferred from a two-tier system to single tier in 2016-17. Data captured by Council shows that there was no significant movement in water consumption due to this change.

Modelling undertaken during the preparation of the 2018-19 Revenue Policy has indicated that majority of households will not be subject to significant movement in cost of water.

It is predicted that the pricing sensitivity of the revised pricing model will not affect water consumption in any of the towns affected.
