## Fyre Gallery

FYREGALLERY will be exhibiting "Time and Space", a joint show with Angharad Dean (painter and printmaker), Marijke Gilchrist (encaustic painting, using heated beeswax, damar resin and pigment), Simone Doherty (printmaker and woodcrafter), Cheryl Pryor (painter) and Caroline Reid (pastelist and ceramicist).

"Time and Space" is a metaphor for both how, as female artists, we make art, and as landscape artists we relate to our source of inspiration. Our work both captures time in the landscape around us, and is created by us making the time and space in our lives for our art. Our art captures the beauty and diversity of the Australian landscape in a variety of mediums, as diverse as the country we portray.

Marijke's shimmering encaustics feature seascapes and the red Centre with great depth of colour. Angharad's paintings and prints look at the way time changes in space - encapsulating the ebb and flow of light on water, land and in the trees. Simone presents beautifully prepared botanical woodblock prints and drawings along with intricately detailed woodcraft. Caroline's bold pots stand next to her bright pastel impressions of local landscapes and Cheryl's landscape paintings are evocative of the space around us.
