

INTERSECTION UPGRADES

Antill and Collett Street

November 2021

What is being done?

Stop signs are being installed at the intersection of Antill Street and Collett Street.

Concrete islands will be removed and new pedestrian refuge islands will be installed. There will also be additional line marking, signage and kerb ramps.

Impact on drivers and pedestrians

Drivers should adhere to traffic conditions including temporary speed limits, follow traffic control and be prepared for minor delays while works occur.

At stages during the project, the footpath will be closed and detours will be in place for pedestrians.

Impact on residents

Residents should expect some minor changes to traffic conditions.

No driveways will be fully blocked off during construction, however Lawrence Court will be limited to a left-turn only into the driveway.

Why do we need to do this work?

This intersection has had a number of vehicle crashes, including crashes involving pedestrians and cyclists.

The work will reduce the risk of these crashes, improving safety at the intersection by installing stop-signs and line-marking and a new pedestrian refuge island.

When will the work begin?

Construction is expected to begin in late January and be completed by early March.

For updates, see the project webpage at: www.qprc.nsw.gov.au/Antill-Collett-Sts
