Ellerton Drive extension

Community update

Bridge construction continuing over the Queanbeyan River, looking south

April 2020

The Ellerton Drive extension is nearing completion and is expected to open mid-2020, weather permitting. We will update the community as work progresses prior to opening the new road.

Bridge construction progress

Work on the bridge has reached a significant milestone with all nine bridge segments now launched across the Queanbeyan River. Work is continuing to complete the bridge deck, install barriers and railings on the bridge and construct the road approaches.

Bridge and road construction underway, looking west along the Queanbeyan River

Landscaping work

Landscaping work has progressed significantly in recent months. Tree and shrub planting has started along the southern bridge approach and other locations along the new road. Revegetation work around the banks of the Queanbeyan River and the bridge piers is expected to start this month and will include native trees, shrubs and grasses.

Revegetation work completed along the new road

Road construction

Pavement work on the existing Ellerton Drive was completed in January 2020. Work to complete the road pavement along the remainder of the extension is nearing completion, including along the shared paths.

We are continuing work on

- road and shared path connections to Barracks Flat Drive
- construction of bridge approaches
- noise wall construction in Fairlane Estate
- installing road signage and traffic barriers
- work to connect to the Old Cooma Road and Edwin Land Parkway intersection, including upgrading traffic signals
- landscaping and planting.

and freight

Thanks for your patience

Work is planned to ensure the impact on neighbours is reduced where possible, however sometimes our work can still cause inconvenience. The project team would like to thank our neighbours and the broader community for their patience during construction. Our standard working hours are 7am to 6pm on weekdays and 8am to 1pm on Saturdays.

Start of Ellerton Drive extension at Queanbeyan East, with noise walls and fauna fencing complete

9 of 9 bridge segments launched

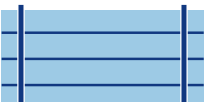

4.4km of 4.4km drains now in place

3.9km of 4.4km paving laid

2 of 3 overhead fauna crossings underway

7 of 7 noise walls underway or complete
