QPRC

THIRD EDITION

Works Update Araluen Landslips

Council's contractors Dale and Hitchcock will be on site from Tuesday 30 August to commence repairs on Araluen Road.

The contractor will begin on Site 1, which is the landslip directly south of the existing traffic light section.

Another set of traffic lights will be installed around the worksite for the duration of the works, which is expected to take approximately nine weeks to complete, weather permitting.

Throughout the works traffic will be reduced to one lane, with the other being used for construction activities.

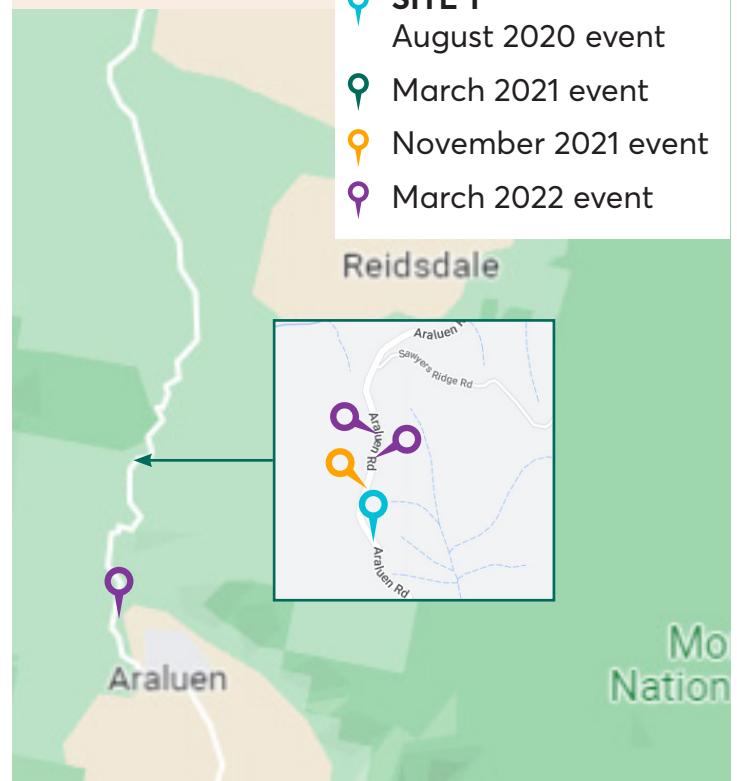

Sites 2 and 3 on the unsealed section will not begin until early October. We will arrange a meeting with affected residents in early September to discuss the road closures required for this section.

We have now received the preliminary designs for the remaining declared slip sites. We are now working with consultants to draft the final designs before going to tender for the works. We aim to secure a contract in November.
