### Classifications

#### Pricing Principle

|   |                                   |  |
|---|-----------------------------------|--|
| A | Public Good                       | Service provides a broad community benefit. Inconceivable or impractical to charge for service on a user basis   |
| B | Practical Constraint              | Service is a minor part of the overall operation of the Council, or the potential for revenue collection is so minor as to be outweighed by the costs of collection. |
| C | Shared Benefit                    | Benefits from provision of the service accrue to the community as whole as well as individual users (Community Service Obligation).                                  |
| D | Stimulus                          | A stimulus to the demand for the service is required. In the short term, only part of the cost of the service is to be recovered.                                    |
| E | Evasion                           | Charging prices to recover full cost may result in widespread evasion.   |
| F | Amended                           | The service is targeted to low income users.   |
| G | Economic/Social/Community Welfare | Service promotes or encourages local economic or social activity   |
| H | Private Good                      | Service benefits particular users, making a contribution to their individual income, welfare or profits, without any broader benefits to the community.              |

## Explanation Table [continued]

|   |                        |   |
|---|------------------------|---|
| I | Monopoly               | Council has a monopoly over provision of the service and there is no community service or equity obligation.  |
| J | Development            | Fee set will enable Council to develop and maintain a service.  |
| K | Contribution           | Charges levied to compensate community for an increase in demand for service or facilities as a consequence of a development proposal.  |
| L | Regulatory : Non-Fixed | Fee charges to cover costs incurred by legislative requirements where no community service obligation exists.   |
| M | Regulatory : Fixed     | Fee fixed by legislation.   |
| N | Market                 | Service provided is in competition with that provided by another council or agency (private or public) and there is pressure to set a price which will attract adequate usage of the service. |
| O | In-House               | Service provided predominantly for Council use but sale to external markets may defray costs.   |
| P | Entrepreneurial        | The service is a profit making activity and the price paid by users should recover an amount greater than the full cost of providing that service.  |
| Q | Penalty                | Fee charge is greater than cost of the service so as to act as a dis-incentive.   |
| R | Utility                | Fee charges for possession, occupation or enjoyment of Council Land, Public Land and Air Space by Gas, Electricity, Telecommunications and Water Utilities.                                   |
